PROFILE

As a passionate and motivated final year Computer Science Engineering student, I have honed my skills in front-end development, with a strong focus on Vue.js. With a keen eye for design and a commitment to creating seamless user experiences, I am dedicated to building responsive and visually stunning web applications.

PROFESSIONAL SKILL

Vue.js Empowering interactive web experiences with elegance and efficiency

JavaScript Empowering Web Development Through Dynamic, Efficient, and Scripting Capabilities.

EDUCATION

Bachelor of Technology

2020-Present

St. Joseph's College of Engineering, Palai

B.Tech in Computer Science Engineering: Pioneering technology and problem-solving through rigorous academics.

Higher Secondary Education

2018-2020

St. Sebastian's HSS, Kadanad

Higher Secondary Education at St. Sebastian's HSS Kadanad, accredited by Kerala's Department of Higher Secondary Education, specializing in Biology Science.

PROJECTS

MEDxSJCET - Hospital Management System

MEDxSJCET is a dynamic and open-source Hospital Management System, released under the MIT license, aimed at modernizing healthcare administration. This project seamlessly integrates front-end technologies (HTML, CSS, Vanilla JavaScript) with a robust back-end (PHP) and a secure database system (MySQL) to create an efficient and user-friendly platform.

DAKSHA: Empowering Education for the Underprivileged

DAKSHA FOUNDATION is a non-profit digital platform dedicated to eradicating illiteracy among underprivileged children in Kerala. The name "DAKSHA" draws inspiration from the Sanskrit word, signifying "able" or "expert," underscoring our commitment to empowering young minds with a strong academic foundation and valuable life skills.
